The University of Minnesota Talented Youth Mathematics Program (UMTYMP) has invited

(Print Student’s Name)

to participate in UMTYMP during the 20___-20____ school year.

This is official notification of the following student’s intent to participate in the program:

UMTYMP recommends that this student not take a mathematics course in your school, since by Minnesota state law, the student will receive High School mathematics credit for UMTYMP coursework. Possible alternatives to a math class would be for the student to only sit in on a math course or to enroll in study hall. Please ensure that a math teacher at your school maintains contact with UMTYMP students. The Math League Team coach should be aware that UMTYMP students make very good candidates for the team.

UMTYMP classes are generally held weekly -- Mondays through Thursdays (depending on student’s level within the Program) from 4:00 to 6:00 in the afternoon. Please assist the student in arranging a schedule to enable him/her to attend classes.

We ask students for the NAME of a contact person from your school to whom grades and correspondence should be sent. Please provide the student with this information.

If you have any questions, please call the UMTYMP office at 612-625-2861.

Thank you for your assistance.
